

*We welcome everyone interested in pig Health and Disease*

**1st European Symposium on Porcine Health Management  
August 27th – 28th 2009  
Faculty of Life Sciences, University of Copenhagen, Denmark**

The European College of Porcine Health Management (ECPHM) is happy to announce the first in a new line of annual international symposia on pig health. Invited speakers will be high ranking researchers and experts predominantly from European countries. Participants from all European regions will obtain expert level update on the newest results in the area of porcine health management. The setting this year is the modern and cosy university environment at the Faculty of Life Science at the University of Copenhagen.

The target group are the specialized pig herd health consultants and researchers. You will meet the leading colleagues from many other European countries. Participant interaction and discussions will be given priority.

The symposium subjects includes: The future of porcine health management, Viral, bacterial and non-infectious reproductive problems of the sow and pathological diagnosis of enteritis. Furthermore, reports on emerging diseases (influenza, neonatal diarrhoea etc.) and zoonosis will be presented. ECPHM residents will present new results from current research projects. Until July 31<sup>st</sup> free communications will be accepted primarily as posters.

Fees before July 31<sup>st</sup>:  
Diplomates ECPHM: 190 EURO  
Other: 220 EURO
